

Unified Operational Intelligence for every site you run

Built by Intellve, MonitoringHub unifies intelligence across sites and systems, giving leaders the visibility to anticipate risks, coordinate action and keep operations running.

600,000+

Cameras, sensors, and devices

20,000+

Sites monitored

70+

Enterprise customers

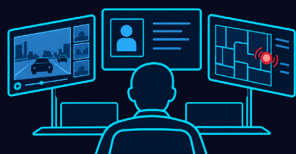

10+

Years of industry experience

THE CHALLENGE

Many Systems. Many Consoles. No Single Picture.

Separate systems leave teams to piece together what happened.

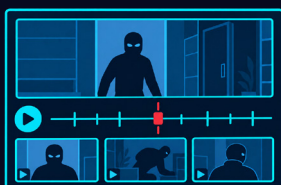

Fragmented visibility

Separate operators and consoles. No shared operational picture.

Critical alerts missed

Urgent incidents disappear in routine event noise.

Response after the loss

Footage is reviewed after the incident.

Failures go unnoticed

Faults remain undetected. Equipment is replaced instead of serviced.

Evidence at risk

A damaged or stolen recorder can erase essential evidence.

Dependencies multiply

Each new system adds a vendor, contract and console.

The Impact Across Your Business

CFO / COO

Rising staffing, insurance and asset costs.

Security Head

Slower response. Harder to demonstrate accountability.

Facilities / IT

More systems to monitor, maintain and extend.

One Integrated View of Disparate Systems. One Place to Manage Every Workflow.

MonitoringHub is Intellive's operational intelligence platform. It centralises camera surveillance and alarm management for intrusion, fire, access control, RTUs and video analytics across unlimited sites. Brand-agnostic and browser-based, it sits above existing infrastructure. No rip-and-replace. No vendor lock-in.

Unified Visibility

Physical and digital infrastructure in one operating picture.

Coordinated Response

Structured workflows, SLA enforcement, cross-domain action.

Decision Velocity

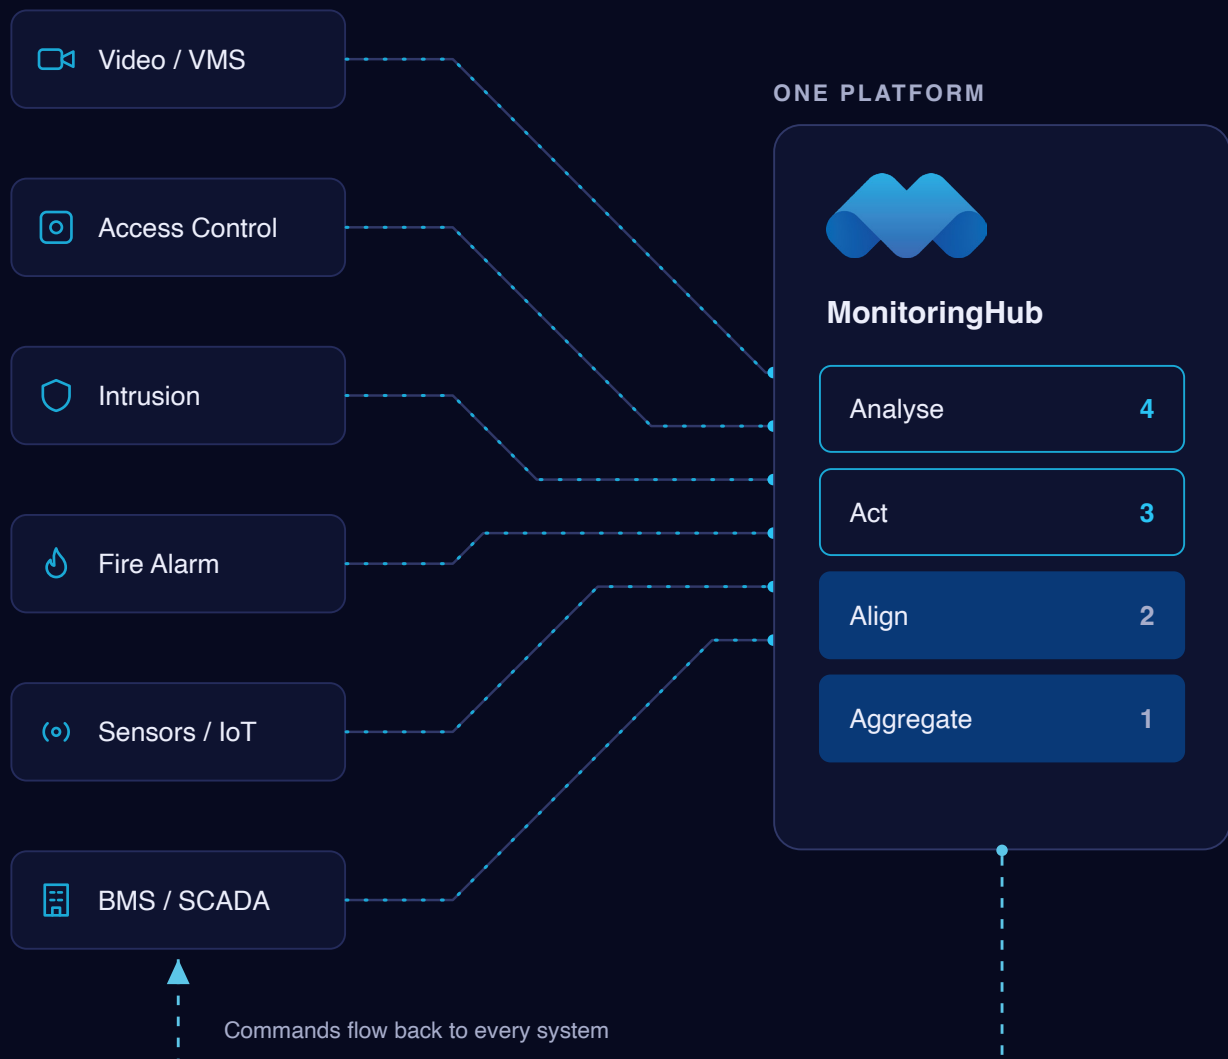

The right information at the right moment, not hours later.

Resilience at Scale

20,000+ sites, without breaking.

SYSTEMS, ANY BRAND

Nine Hubs. One Platform.

Each Hub handles one operational job. Use it independently or combine it with other Hubs on one platform. Start with the capabilities you need and expand as operations grow.

120+ Integrations

9 Hubs

Brand-agnostic across 120+ integrations
Any camera, VMS or access control brand.

9 hubs, each licensed separately.
Scale cost with capability.

The Hubs

IntelliveAI

COMING SOON

WatchHub

Live views and synchronised playback across every site.

- 7x7 mosaics and video walls
- PTZ, two-way audio and synchronised playback
- Camera filtering & quality checks

AlarmHub

Manage alerts and guide teams through the response.

- Alert by rules, all managed in one Hub
- SOP-led handling with complete audit trail
- User configurable rules, schedules and workflows

The Hubs, Continued.

VaultHub

Keep footage protected, even when recorders fail.

- Continuous, time based or event-based backup
- Retention by site, zone or camera
- Schedule your backups

PulseHub

Spot device failures before they become blind spots.

- Status of cameras, NVRs, panels and controllers
- Automatic service tickets on failure
- Availability and downtime reports

ControlHub

Operate connected devices remotely, with every command logged.

- Arm or disarm intrusion and fire panels
- Lock/ Unlock Doors, Relay, hooter and siren control
- Command audit log

AssetHub

Track assets with their warranties, service history and maintenance.

- Asset register and warranty history
- Warranty-expiry and maintenance reports
- Service ticket assignment and resolution

BroadcastHub

Reach the right people as events happen.

- Rule-based or manual broadcasts
- Email, SMS, WhatsApp

InsightHub

Bring operational performance into one management view.

- Dashboards with site drill-down
- User customisable & detailed reports
- Response-time, uptime and compliance KPIs

Open, Secure and Built to Scale

An open, API-first platform for multi-vendor operations and regulated industries.

Integration and Scale

Connect Existing Systems

Cameras, access control, fire alarms, IoT and third-party analytics.

Stream in Your Browser

Low-latency H.264 / H.265 video.

Scale Across Sites

Independent microservices. No software limit on sites or cameras.

Keep Operations Running

With downtime updates and automatic notification.

Deployment

- On-premises
- Private cloud, SaaS or hybrid
- OS: Windows & Linux

Access

- Browser and Mobile Apps

Notifications

- Email
- SMS
- WhatsApp
- Templates and escalation

Reporting

- PDF
- CSV

Security, Governance and Audit

Configurable Hierarchy

User-defined levels to mirror any organisation structure, e.g. Region · Site · Zone · Device.

Role Based Access Control

Role-based permissions at page and action level.

Data Segregation

Device Access Groups restrict cameras and zones by user, region or business unit.

Identity

Signed session tokens, encrypted credentials, single-session enforcement and account lockout.

Audit

Immutable audit logs, review of alert closures and a record of every manual command.

Trusted by 70+ Enterprises

One Platform. Every Industry. Proven Across 20,000+ Sites.

Results Across Sectors

Banking

1 hour → 60 seconds

3,500+ branches. 40% lower insurance premiums. ~INR 100Cr cost saving.

Manufacturing

16 plants, one platform

400 cameras. Quality assurance without site visits.

Energy

45 sites

CCTV, fire alarms, video analytics and vehicle tracking on one platform.

Transport

75,000 cameras

Railway network monitored centrally. RDSO-approved.

Education

5,000+ cameras

20+ campuses. Device health and recording verified centrally.

ABOUT INTELLVE

Intellve builds software that does more than monitor. Its flagship platform, MonitoringHub, unifies security, safety and operational systems across every site, turning millions of daily events into coordinated, real-time response. Built in India, Intellve serves banking, logistics, retail, hospitality, education, critical infrastructure, telecom and smart cities, with more than 600,000 devices across 20,000+ sites under management.

CERTIFIED

APPRAISED

NEXT STEP

Unified intelligence. Faster decisions. Lower risk.

See MonitoringHub running on the systems you already own.
